Principal, Yudelson Assoc. Author of *Green Building Trends: Europe and Greening Existing Buildings*

Chris Allen

Director of the AskNature Project at The Biomimicry Institute

Gulf Coast Green 2010 Symposium and Exhibition will again be the leading green conference in the south for the fifth year, bringing together professionals from the gulf coast region for a two day symposium. The theme of the 2010 Symposium is **REFRAMING OUR BUILT ENVIRONMENT** and will be divided into the following session tracks

The Business of Green

Speakers in this track will explore economic opportunities in the sustainability movement. Topics may include job creation, the marketing of green building products and services, and return on investment for green strategies.

Renovating the Future

Upgrades to existing buildings and interiors are especially critical to reducing the carbon footprint of our industry. Speakers in this track will discuss strategies that work for health, energy savings, material resources, and economic payback.

Geography of Change

Project location and site design have become more critical than ever with changes to LEED and to local ordinances. Speakers in this track will address land analysis, planning, design, management, preservation, and rehabilitation for the health of people and ecosystems.
